“conventional”, 6–7

Disney, 7–8

early devices

phenakistoscope and praxinoscope, 5–6

thaumatrope, 4, 5*f*

zoetrope, 4, 5*f*

zoopraxinoscope, 6

video art, 9

Animation languages

actor-based animation, 118–119

articulation variables, 117

artist-oriented

ANIMA II, 116

command language, 116

values/variable names, 116

description, 115

full-featured programming, 116–117

graphical languages, 117–118

script, 115

script-based, 115

Arc length

adaptive approach

forward differencing, 72

parametric value, 72

segments, 72

tests, subdivision, 72, 73*f*

adaptive Gaussian integration, 74–78

analytic approach, 69

animator, 66–67

curve fitting, 90–91

distance-time functions

motion constraints, 89, 89*f*

sample, 88, 88*f*

space curve, 89

user-specified values, 87, 87*f*

velocity-time curve, 86–87

ease-in/ease-out (*see* Ease-in/ease-out)

estimation

forward differencing, 69–72

integral numerically, 73–74

LENGTH (u_a , u_b), 68, 68*f*

Newton-Raphson iteration, 78

parameterization, 67, 68

position-time pairs constraining motion, 66, 66*f*

space curve and distance-time function, 67

speed control

distance-time function, 80

function’s input parameter, 79

motion, 79

parameter, 79

space curve, 79

traversals, 78–79

three-dimensional space, 67

Artificial intelligence (AI)

cognitive modeling, 340

humans, 354

Assemble editing, 19

AutoDesk’s Maya, 117

Autonomous behavior

arbitration, 356

association, 355

control, 356

environment, 354–355

internal state, 355

levels, 355, 356*f*

B

Behavioral animation

cognitive modeling (*see* Cognitive modeling, behavioral animation)

crowds (*see* Crowd modeling)

defined, 339

environment

local acquisition, 352

memory, 353–354

vision, 352–353

modeling, intelligent (*see* Intelligent behavior)

primitive

flocking (*see* Flocking behavior)

prey-predator behavior (*see* Prey-predator behavior)

Beta movement, 2

Billboarding and impostors

camera, 405

Billboarding and impostors (*Continued*)

defined, 403–404

trees, 404, 404f

Blend shapes, 119

character, 327, 328f

vertex position, 327–328

B-splines, 463–465

C

Camera calibration

coordinate systems, 499f

eigenvector, 500–501

image, point, 190–191, 191f

model, 190, 190f

two-dimensional image coordinates, 498–500

Catmull-Rom spline, 455–458

CCD (*See* Cyclic coordinate descent (CCD))CFD (*See* Computational fluid dynamics (CFD))CG (*See* Computer graphics (CG))

Cloth

defined, 235

direct modeling, folds

catenary curves, 237, 238f

constrained and grid coordinate space, 237, 237f

procedure, 237

relaxation process, 239–240

triangles subdivision, 237–239, 238f

triangulation, constrained points, 237–239, 238f

draping behavior, 235–237

physically based modeling

characteristics, 240

collision, 243, 244

control, bending, 241–242, 242f

control, skew distortion, 241

effective, 242–243

energy function, stretching, 244

mass-spring-damper system, 242

simulations, 243

stretching, 240–241

super-elasticity, 243

simulation, 309

visual qualities, figures, 309

warp and weft patterns, 235, 236f

woven, 235

Clouds modeling and animation

anatomy and formation

air mass, 265

moisture cycle, 264

types, 264

CG (*See* Computer graphics (CG))

cirrus and cirrostratus, sunset, 262–263, 263f

cumulus, 262–263, 264f

Cognitive modeling, behavioral animation

aggregate behavior, 341, 341f

intelligence and individuality, 340

neutral behavior, 340

rule-based approach, 340

Complex joints, 163

Compositing

advantage, 389

computation, foreground image, 389

defined, 388–389

with pixel depth information

categorization, pixels, 396, 396f

Comp operator, 395–396, 397

operators, image sequence, 395

over operator, 395

z-depth operator, 395

without pixel depth information

alpha channel, 394

anti-aliasing combined scenes vs. alpha channel, 391–392, 393f

correlated colors, pixel, 393, 394f

distributed color fragments, pixel, 392–393, 394f

gray-scale mask, 391

one-bit occlusion mask, 390, 391f

operation, 393

over operator, 392

pixel color computation, 392

two-and-a-half dimensional, 390, 390f

Computational fluid dynamics (CFD)

defined, 270

equations

conservation, momentum, 274–275

conservation of mass, 273–274

element, NS, 272, 273f

Euler, 273

gaseous phenomena, modeling, 270

modeling, fluids

grid-based method, 271, 275–277

hybrid method, 272

particle-based method, 271–272, 277–279

steady-state flow, 270

Computer animation

artistic animation, 1–2

“conventional” animation

camera tricks, 6

cinematograph, 6

panning and rotoscoping, 7

vaudeville acts, 6

definition, 1

Disney, 7–8

mid-1980s and beyond
